JAYENDRA

AI Automation Engineer • n8n Specialist • Generative AI Workflows

■ Hyderabad, India | ■ jayendrasees3121@gmail.com | ■ linkedin.com/in/jayendra | ■ Open to Hybrid / Remote • Hyderabad

PROFESSIONAL SUMMARY

AI Automation Engineer with 3+ years of IT experience, specialising in n8n workflow automation, Generative AI tools, and intelligent business process automation. Built 8+ production-grade automation pipelines integrating APIs, Telegram bots, AI agents, and email systems. Hands-on with 7+ AI tools including ChatGPT, Claude, Midjourney, Runway, and D-ID. NxtWave CCBP 4.0 Industry Ready certified. Seeking AI Automation roles in Hyderabad where I can design and deploy intelligent workflows that drive real business impact.

TECHNICAL SKILLS

n8n Automation: Workflow Design, API Integration, Webhooks, HTTP Nodes, AI Agent Nodes, Trigger-based Pipelines, Conditional Logic, Multi-step Automation, Telegram Bot, Email Automation (SMTP/Gmail), Google Sheets Integration
AI Tools: ChatGPT (Prompt Design & API), Claude (Anthropic), Midjourney, Pictory, Runway, D-ID (AI Avatars), Lovable (AI Web Builder)
Programming: JavaScript, Python, HTML, CSS
Web & Design: WordPress, Figma, Canva, Wix
Content AI: YouTube Script Automation, AI Video Editing, AI Thumbnail Generation, AI-based Content Pipelines

KEY PROJECTS

Content Creator Competitor Research Automation — n8n + AI Agents + Google Sheets • Built a fully automated n8n pipeline that researches and compiles competitor data for any content niche using AI search and web scraping nodes • Integrated AI agents to analyse competitor channels, extract key metrics, and auto-populate structured reports into Google Sheets — saving 4–6 hours of manual research per week • Pipeline handles 10+ data sources, filters duplicates, and delivers clean output with zero manual intervention

AI-Powered Invoice Generator Agent — n8n + AI + PDF Generation + Email • Developed an AI-powered invoice generation agent using n8n that auto-fills invoice templates from form triggers or chat inputs, then emails the PDF automatically upon generation • Reduced manual billing effort by ~80%, with zero errors on invoice fields — fully production-deployed • Integrated 3 external APIs: form webhook, PDF generator, and SMTP email delivery in a single pipeline

Telegram & Email Multi-Channel Automation System — n8n + Telegram Bot API + SMTP/Gmail • Designed and deployed n8n workflows that automate multi-channel notifications via Telegram bot and email, triggered by events, form submissions, or schedules • Integrated AI response nodes to create smart bot replies that handle customer queries and auto-route messages to the correct email recipient • System handles 2 notification channels, 5+ trigger types, and conditional routing — zero human intervention required

PROFESSIONAL EXPERIENCE

SiyaVedhas Technologies — Hyderabad IT Developer — Enterprise Automation & ERP Dec 2022 – Present

- Designed and developed end-to-end business automation solutions for US-based enterprise clients (Aprio LLP, Jornard Tools) — covering workflow design, development, and testing • Built custom automation scripts and data pipeline tools that reduced manual data processing time and improved reporting accuracy for finance and operations teams • Collaborated with international stakeholders to gather requirements, debug issues, and deliver solutions within deadlines following best practice coding standards

CERTIFICATIONS

1. NxtWave CCBP 4.0 Industry Ready — Full-Stack Development & Real-World Software Projects (Hyderabad) 2. AI Tools & Automation Certification — AI-driven content generation, creative AI tools, and automation workflows 3. Website Designing Course Completion Certificate — HTML, CSS, Responsive Web Design
